AWS Certified Solutions Architect & Backend Engineer specializing in Java, Spring Boot, and cloud-native infrastructure. Proven track record in automating CI/CD pipelines to reduce deployment effort by 80%. Focused on building scalable, event-driven systems and integrating AI augmentation to optimize development workflows.

Professional Experience

Novas Arc | Hyderabad

Jr. Software Engineer Intern | Sep 2025 – Dec 2025

- Architected AWS CI/CD pipelines using Docker, automating build and test workflows which reduced manual deployment effort by 60-70%.
- Optimized cloud resource allocation by right-sizing EC2 instances and implementing CloudWatch dashboards, resulting in measurable monthly cost savings.
- Managed 5-6 concurrent CI/CD pipelines across Production, QA, and Test environments to ensure zero-downtime deployments.

Cisco Networking Academy | Remote

Network Technician Intern | Jun 2025 – Jul 2025

- Configured SOHO networks, DHCP, and IP addressing schemes in laboratory environments.
- Troubleshoot routing, switching, and DHCP-related issues to improve network stability and connectivity.

Key Projects

ML Compute Marketplace | *Java, Spring Boot, Rest APIs, HTTP Client, Docker, PostgreSQL, React.js*

- Designed a distributed job scheduling platform that executes user-submitted ML workloads across compute nodes, supporting asynchronous execution and lifecycle management.
- Implemented resource aware scheduling, worker heartbeat monitoring, dead worker recovery, job retries, and Docker-based execution to ensure fault-tolerant workload processing.
- Developed a worker agent responsible for registration, job polling, Docker container execution and result uploads.
- Engineered billing and revenue-sharing logic, calculating compute costs from actual job execution time while excluding dataset transfer and image download overhead.

Cloud-Native Journal Application | *Spring Boot, Rest APIs, Kafka, MongoDB, Redis, AWS*

- Developed a cloud-native journal application with authentication, event-driven messaging, and NoSQL persistence.
- Leveraged Kafka producers and consumers to decouple sentiment processing from email notification workflows.
- Optimized application responsiveness through Redis-backed caching and MongoDB data storage.

Technical Skills

- **Languages & Scripting:** Java (Spring Boot), Python, Bash, JavaScript (React.js)
- **DevOps & Infrastructure:** AWS (EC2, S3, IAM, CloudFront, CodePipeline), Docker, Kubernetes, Terraform
- **AI & Data:** MLOps, PostgreSQL, MongoDB, Redis
- **System Admin:** Linux, Prometheus, Grafana, Git/GitHub
- **Fundamentals:** Data Structures, Operating Systems, Computer Networks

Certifications

- [AWS Certified Solutions Architect – Associate](#) (2026)
- [Oracle Certified Foundations Associate](#) (2025)
- [Continuous Delivery & DevOps](#) – University of Virginia (2025)
- [Advanced React](#) – Meta (2026)

Education

Bennett University | Greater Noida, India

Bachelor of Technology in Computer Science & Engineering | Aug 2024 – Aug 2028
